Amman, Jordan | +962 798691559 | Layansabha@yahoo.com [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Fresh graduate in Cybersecurity with a practical, hands-on approach to learning and building. I've gained real experience working with automation, containerized environments, CI/CD pipelines, and cloud basics, and I'm focused on developing secure and reliable DevOps workflows. Fast to learn, adaptive, and highly motivated to grow inside engineering teams while contributing to efficient, secure delivery processes.

SKILLS

- **Technical Skills:** distributed systems, penetration testing, web vulnerability assessments, ISO 27001, GRC frameworks, bug hunting.
- **DevOps Tools & Technologies:** DevOps fundamentals, CI/CD (GitLab, Jenkins), Docker, Kubernetes, containerization and orchestration, SonarQube, Trivy, Terraform, Grafana, monitoring and logging basics, cloud fundamentals, Git/GitLab, DevSecOps basics.
- **Programming:** Bash scripting, HTML, CSS, YAML.
- **Languages:** Arabic, English.

EDUCATION

Bachelor of Cyber Security Hashemite University | 2021 - 2025

EXPERIENCE

Full Stack Engineer (Contract-Based Project) | Family Medicine Clinic – Abdali Hospital | Dec 2025 – Present

- Design, develop, and deploy a fully functional internal clinical system, independently owning the complete frontend and backend development lifecycle.
- Manage server configuration, deployment, and ongoing system maintenance to ensure stable and secure production operation.

Devops Intern at Digitinary | Mar 2025 - Apr 2025

- Gained practical experience in DevOps fundamentals and CI/CD pipelines using GitLab.
- Built Docker containers from scratch and managed Kubernetes clusters (nodes and workers setup).
- Implemented quality checks with SonarQube and secured containers with Trivy.
- Developed a solid understanding of containerization concepts and orchestration.
- Applied Monitoring and Logging basics to enhance system visibility and reliability.

Cyber Security Intern at Estarta Solutions | July 2024 - Sep 2024

- Conducted penetration testing and identified security vulnerabilities in web applications.
- Supported ISO 27001 audits and implemented compliance strategies.

Network Engineer Intern at PSUT X CISCO | Aug 2022 - Nov 2022

- Configured and troubleshoot Cisco networking devices. Implemented and verified routing and switching protocols.

PROJECTS

TRIO | 2025

- Designed and implemented an AI-powered DOM XSS haunting model.
- Integrated automated testing scripts for vulnerability validation.

Amanak | 2024

- Developed a Spring Boot backend and Android XML-based mobile app to combat cybercrime in Jordan.
- Built a full android application with user website, admins dashboard.

CERTIFICATIONS • **CompTIA Security+ | 2023** • **CCNA Exam Certificate | 2025**
